Reviewer: David Alexander from Jacksonville, FL United States

CertMaster training seems good so far, Kind of bummed that I received a 12% off coupon the day after I made my purchase.

#### **Network +**

September 19, 2015

Reviewer: Clint Parker from huntington beach, CA United States

The materials were clear and easy to understand. A couple questions weren't correct on Certmaster, but that's OK.

#### **Confusing reference to previous questions**

September 10, 2015

Reviewer: Terri Tremblay from Ocala, FL United States

Personally I would like to see more questions but what was there was good. The only problem I found that comes to mind is on the Troubleshooting module under common fiber cable. . . two of the questions started "Using the previous scenario,". Now this is great if the questions aren't mixed up but when they come at you in random patterns it makes for a confusing time. Other than that I liked what I saw, some book studying and retaking these tests and I'll be ready for the actual test!
